

BAG HOUSES & DRY SCRUBBING SYSTEMS

Setting the standard

- Reagent & Sorbent Injection Systems
- Engineered to suit the Australian market
- Nationwide support in all states and territories
- Industry leading safety, compliance, efficiency and Reliability
- Safe access to all serviceable components
- Modular & configurable design
- Common inlet manifold
- Common outlet manifold
- Optional bypass valve
- Optional Inlet Isolation valves
- Optional Inlet Isolation valves
- Optional dust outlet valves
- Optional dust screw conveyors
- Pulse Jet Bag Filter Cleaning
- Differential Pressure Control
- Process Instrumentation
- Designed in Australia
- Full EPCM capability

Applications

- Dry Scrubbing
- Air Pollution Control
- Flue gas Cleaning
- Acid gas removal
- Dust capture
- Heavy Metal & Dixon capture
